EU DATA ACT

The EU Data Act (Regulation (EU) 2023/2854) is a key legislative framework that regulates data access and usage rights across the European Union. It aims to ensure fair and transparent data sharing practices, empowering individuals and businesses to access and control the data generated by connected devices, including vehicles. "Brand" is committed to implementing solutions that comply with the EU Data Act, fostering trust in data-driven services and innovation.

For more information on the EU Data Act you can follow this link:

Go to EU legislation

Your data, your rights

In accordance with the EU Data Act, we uphold the principles of transparency, fairness and user control in data sharing. The legislation ensures that generated data is accessible under well-defined conditions while prioritizing security and compliance.

Key aspects of the EU Data Act include:

- User Control & Transparency: Individuals and businesses have the right to access and manage their generated data
- Fair Access & Usage: Users can request their data for themselves or share it securely with selected parties
- Data Security & Compliance: Data sharing follows strict security measures and legal safeguards
- Dispute Resolution Mechanisms: Clear procedures exist to resolve data access conflicts

Public authorities may request access to specific data under exceptional circumstances, such as emergencies or urgent public needs. These - and all other requests – will be handled in accordance with established legal frameworks to maintain compliance and data security.
